

TWO-TEAM TRUCK & TOWER OPS

FOR DEPARTMENTS WITH OR WITHOUT A TRUCK...

Presented by Traditions Training, LLC ~ "Experience-Based Firefighter Training"

www.TraditionsTraining.com

Activities that are typically categorized as "truck work" must be performed at every fire scene, regardless of weather or not an actual aerial apparatus is present. This program is designed for departments with or without a dedicated truck company and will focus on best practices for the "attack phase" of the fire. This interactive seminar will focus on maximizing the capabilities of your resources, both equipment and manpower.

- ❖ **"The Two-Team Truck"** – To address the challenges of limited manpower, it is imperative that we use our people wisely. We will discuss the advantages of two teams operating in a coordinated manner to address a variety of essential truck company tasks simultaneously. Topics to be discussed include tool selection, personnel assignments, and operational priorities.
- ❖ **"Trucks vs Tower Ladders"** – Various types of aerial apparatus offer distinct advantages and disadvantages in both the offensive and defensive fireground setting. Using a variety of case studies, we will look at how different apparatus types can be used most effectively in various operational situations. We will also look at apparatus placement issues.

About the Instructors:

Nick Martin has 15-years of firefighting experience and is with the District of Columbia Fire Department assigned to Truck Company 6 and is also a firefighter with the Kentland Vol. Fire Department in PG County, Maryland. He is an author for Fire Engineering Magazine and will be presenting at FDIC 2010.

Doug Mitchell is presently a lieutenant with the FDNY assigned to the 7th Division in the Bronx. With 17-years in the fire service he was previously a firefighter in Fairfax County, VA and will also be presenting at FDIC 2010.

Tony Kelleher is the Chief of the Kentland Vol. Fire Department in PG County, MD. He has over 16 years of firefighting experience and is also a firefighter/technician in the District of Columbia.

Mike Stothers is a firefighter assigned to FDNY's Tower Ladder 13. He has over a decade of fireground experience which includes serving as a USAF firefighter at various overseas posts.

Saturday, June 25, 2010 - 0800hrs to 1600hrs

Hosted by Johnston Fire Department
